FILMLESS

We were the first ones to conceive, develop, test, sail and sell Filmless membrane for sailcloth, we are really proud of the success of this innovation.

5 years have passed since the first sea trial, we can deliver to all our customers a proven material.

FILMLESS MAIN FEATURES

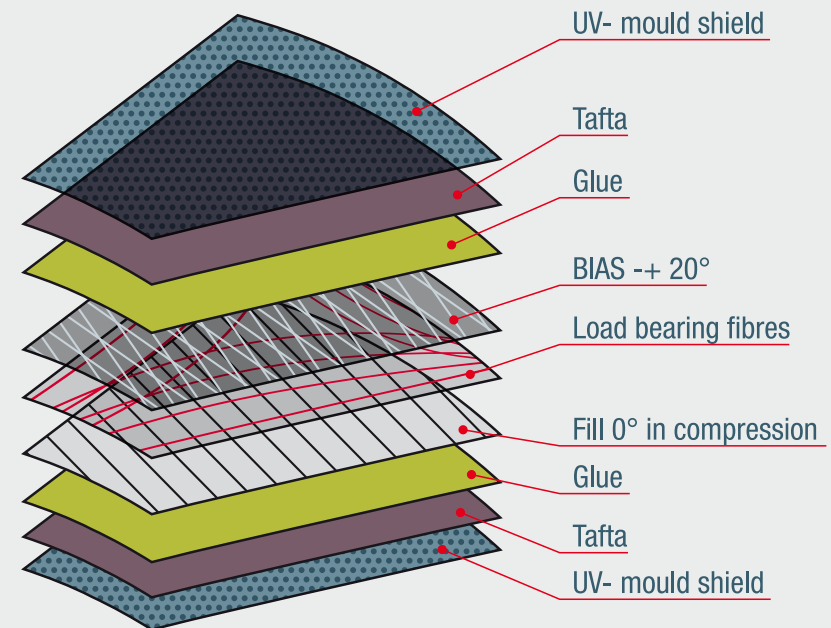

- 100% Made in Italy
- Mold and UV shielded
- Shape stability enhanced up to more than 5 years
- Lighter
- 3 years Warranty

Filmless sails, thanks to their 100% made in Italy core material, are more durable and stable than previous taffetas.

Because they are lighter and have an enhanced shape stability, they can be sailed on racing and offshore boats with outstanding results.

FILMLESS KEY FACTS:

- Production started 5 years ago
- 20000sqm sold
- More than 20 crossings of the Oceans done by different types of boat, including IMOCA, Multi50, Open50, cruising multi and monohulls equipped with Filmless membrane
- Hundreds of boat-owners satisfied all over the world, from Spitzberg to Rio de Janeiro, from Turkey to Japan.
- None of these sails have been substituted because of any technical problem.
